

Q'nique Hopping Feet

Couching Feet

The couching foot helps to embellish your quilt to using yarn and thick threads. There are three sizes for the different thicknesses.

Open Toe Foot

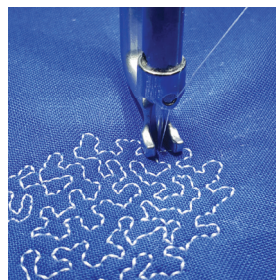

The open toe foot allows full visibility of the needle and great for applique, thread painting, and artistic quilting.

The Glide Foot

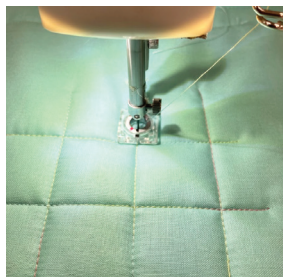

The glide foot has smooth spoon shape which is useful in gliding over quilts with several bulky seams when quilting.

Micro-Stippling Foot

The micro stippling foot adds another layer of dimension to your quilt. It helps with negative space, and can enhance a design or applique.

Square Foot

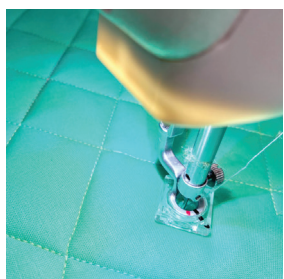

The square foot helps keep your foot straight when creating a straight line.

Ruler Foot

The ruler foot has a thicker toe for use with rulers and templates. The heightened bend in the foot clears most quilting rulers.

Diamond Foot

The diamond foot helps keep angles when quilting a cross-hatch line.

Echo Feet

Echo or outlining quilting is a repeating stitched line of quilting that is a uniform distance away from a block, applique or quilting design.

Q'nique Hopping Feet

Quilt Perfect Ruler kit

This hopping foot kit provides different benefits for using a ruler while quilting. Each of the three feet has a specific function to help quilters improve their precision and accuracy:

Precision Foot: This four-pointed foot helps identify the point on a quilt where you can stop, allowing for improved accuracy.

TrueTrack Foot: Designed specifically to work with the TrueCut product line, this foot locks onto the ruler track for precise straight lines and helps keep the hopping foot against the ruler.

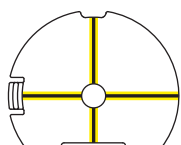

Rolling Foot: This foot reduces friction so your machine glides more smoothly along the ruler. This allows you to push harder against the ruler with less stress on your machine.

Wonder Foot

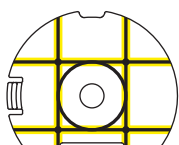

The 360 Wonderfoot is a truly unique hopping foot that makes tasks like stitching in the ditch, offsetting stitch lines, and pattern tracing easy and fun. With full 360° rotation and five interchangeable inserts, the Wonderfoot helps you make beautiful stitch work with less effort.

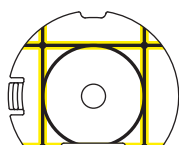

Each insert has a specific function, from stitching in the ditch to echoing patterns and curves. The insert guides help keep you on track as you stitch.
